FOREWORD

The population data shown in this report are based on records of residents registered with Manitoba Health as at June 1, 2015.

Data for the regions include population of cities, towns, villages, rural municipalities, local government districts, and unorganized territories. It should be noted that villages and towns are separately identified if these are incorporated. If unincorporated, the population counts are included in the rural municipality in which these are located.

Population for small areas (for example, a rural town) can be biased because the mailing address may be reported as the place of residence. An individual residing outside the town, but having a mailing address there, may be counted as living within the town. This bias in the population figures is reduced as the catchment area increases. Thus, regional estimates are not significantly affected by the mis-classification bias. Fluctuations from year to year for these small areas might also be affected by changes to mail delivery locations assigned by Canada Post.

The type of place indicates First Nations, unorganized territory, and municipal status of incorporated places (city, town, village, rural municipality, and local government district). The following list indicates the abbreviations used for types of places:

FN First Nation Band

LGD Local Government District - a designated area having no local government; administered by the province through a resident administrator.

R.H.A. Regional Health Authority

RM Rural Municipality

POPULATION REPORTING CHANGES

Internal improvements affecting population reporting have enabled more appropriate identification of on-reserve residents of some First Nations communities as of 2012 and again as of 2015. **Please note that the 2015 improvements in identification of on-reserve residents have been applied retrospectively to the 2014 and 2013 population reports,** because the improvements have a significant effect on certain 2013 and 2014 populations in these reports.

Current-year and five-year populations for RHA Districts were tabulated using the RHA District definitions current as of June 1st, 2015.

MUNICIPAL AMALGAMATIONS

A series of municipal amalgamations, which were enacted between November 2013 and May 2014, came into effect as of January 1st, 2015. The 2015 population reports use the amalgamated municipalities, because these municipalities are the municipalities defined at the population date. To assist in the transition to reporting on the populations of the the amalgamated municipalities, however, we are also providing populations by pre-amalgamation municipality as an appendix to these reports.
