Data extracted: May 15, 2014

#### **Notes and Abbreviations**

#### Notes:

- 1. 3-year-average cases / rate are defined as the average cases / rate reported in the same month over the previous three years.
- 2. Out-of-province cases are excluded.
- 3. The diseases where the current monthly rates are significantly higher than the previous 3-year average rates for the same month are highlighted yellow.
- 4. Syphilis: Due to improved testing and referral processes that took place in 2013, there was an observed increase in the number of records entered into the surveillance system. The data point shown in the table includes all reported Treponema serology-reactive individuals, however these may be infectious and non-infectious cases, as well as those requiring further public health follow-up to determine this status. These factors also make it difficult to draw a comparison to historical data, therefore statistical testing was not done.
- 5. Hepatitis B: This includes confirmed cases of acute infection only, where both surface antigen (HBsAG) and core antibody (Anti-HBc IgM) are positive.

### Abbreviations:

ARO Antibiotic Resistant Organisms

CI Confidence Interval

EMD Environmentally Mediated Diseases

IERHA Interlake-Eastern Regional Health Authority MRSA Methicillin Resistant Staphylococcus Aureus

NRHA Northern Regional Health Authority

PMH Prairie Mountain Health RHA Regional Health Authority

STBBI Sexually Transmitted & Blood-Borne Infections

TB Tuberculosis

VPD Vaccine Preventable Diseases

VRE Vanocomycin-Resistant Enterococci

VRSA Vancomycin Resistan Staphylococcus Aureus

WNV West Nile Virus

WRHA Winnipeg Regional Health Authority
