Introduction

Overview to the Annual Report

This Annual Report is organized in accordance with department's appropriation structure as at March 31, 2022, which reflects the authorized appropriations approved by the Legislative Assembly.

Consistent with the Main Estimates Supplement, the annual report has been enhanced to include Balanced Scorecards to foster operational improvements by reinforcing transparency, urgency, alignment and accountability. As the balanced scorecards continue to be developed, reporting is included where available, with continued inclusion of previous Performance Reporting in the appendix to ensure transparency of results.

The Annual Report also for the first time reports on the department and its Other Reporting Entities (OREs) summary financial results, provides a more detailed breakdown on any changes to its voted budget, and also reports on the department's progress of achieving diversity milestones. The tradition of providing the financial results with any associated variance explanations continues to be provided at the sub-appropriation level. Overall, the new annual report is intended to provide a more comprehensive picture of the department's financial performance.

Aperçu du rapport annuel

Ce rapport annuel est présenté conformément à la structure des postes budgétaires du ministère au 31 mars 2022, qui tient compte des crédits autorisés approuvés par l'Assemblée législative.

En cohérence avec le budget complémentaire, le rapport annuel a été étoffé et comprend maintenant des tableaux de bord équilibrés qui favorisent l'amélioration sur le plan opérationnel en mettant l'accent sur la transparence, l'urgence, l'uniformité et la reddition de comptes. Alors que l'établissement des tableaux de bord équilibrés se poursuit, les renseignements sont fournis quand ils sont disponibles et des rapports antérieurs sur le rendement continuent d'être inclus en annexe pour assurer la transparence des résultats.

Par ailleurs, pour la première fois, le rapport annuel contient les résultats financiers sommaires du ministère et de ses autres entités comptables, fournit une ventilation plus détaillée des changements apportés au budget des crédits votés et rend compte des progrès du ministère en matière de diversité. On continue à fournir les résultats financiers accompagnés d'explications sur les écarts au niveau des postes secondaires. Dans l'ensemble, le nouveau rapport annuel vise à offrir un portrait plus global du rendement financier du ministère.

Department Balanced Scorecards Priorities and Objectives - Details

The following section provides information on key initiatives for Advanced Education, Skills and Immigration for the 2021/2022 reporting year. All Manitoba government departments include a performance measurement section in a standardized format in their annual reports. However, as the Department of Advanced Education, Skills and Immigration was officially formed on January 5, 2021, Performance Measures were not developed until late 2021/22.

The Department did produce Performance Measure content for the 2022/23 fiscal year which can be found in the 2022/23 Supplement to the Estimates of Expenditure (<https://www.manitoba.ca/aesi/estimates.html>). Manitoba's Public Service Commission reports on the whole of government results from the Employee Perspectives Program engagement survey on an annual basis. . The previous Performance Reporting has also been included in the appendix for consistent reporting of results.

Performance initiatives in Manitoba government annual reports are intended to complement financial results and provide Manitobans with meaningful and useful information about government activities and their impact on the province and its citizens.

Departmental Risk

Advanced Education, Skills and Immigration provides leadership in risk analysis through its Comptrollership framework and by creating a risk management culture that facilitates assessment and management of risk. Risk is managed for policy, operations, human resources, financial, legal, health and safety, environment and reputation within a legislative environment, both in regards to the probability of occurrence and degree of damage and strategies for mitigating or minimizing potential situations.

A continuous, proactive, and systematic process is undertaken to ensure that decisions support the achievement of organizational corporate objectives. This enterprise approach ensures that accidents and unexpected losses are minimized.

The department manages its risks under the guidance of its comptrollership plan and all aspects of the central government Manitoba Risk Management Policy. The department must: a) emphasize loss prevention, loss reduction and risk transfer methods; b) identify risks thoroughly; c) identify strategies to mitigate or minimize risk; and d) receive appropriate approval. Specific activities are identified in the department comptrollership framework to meet risk management responsibilities, as follows:

- Preparation of program area business plans (activities, objectives and goals)
- Assessment of the risks identified in the business plans
- Strategy and action plan development for the identified risks (level of risk acceptance and risk mitigation)
- Engaging in awareness, communication, education and testing activity for identified risk areas
- Executive Management Committee oversight on risk and financial management of the department's activities to ensure departmental and government goals are being met

Through fiscal year 2021/22, the Department undertook the following specific activities toward managing its risks.

Risk	Activities taken to reduce / remove risk
Natural disaster – environmental (lack of disaster plan)	As a result of the COVID-19 pandemic, government offices were closed for an extended period of time and staff were required to work remotely from home. Consistent with the Department's Business Continuity Plan, appropriate resources (laptops, VPN access, smartphones, computer applications, etc) were provided to staff for them to transition to working from home with very little impact to operations. The department also updated their websites so that the public knew how to get services while the offices were closed. Business processes were revised so that electronic documents and signatures were used as much as possible to replace traditional paper-based documents and wet signatures.
Damage to property	Despite having offices closed during the pandemic, designated staff went to the office to check on things periodically.
Fraud	The Department's Comptrollership Plan was updated
Overspending	Revenues and Expenditures were monitored regularly to ensure budgets weren't exceeded.
IT System Failure	IT Systems (hardware, software and websites) were enhanced to ensure they met the needs of the online service delivery model as a result of COVID-19 lockdowns to reduce the risk of an IT system failure. Procurement needs were prioritized, modified or delayed as a result of supply chain issues.

Human resources management / workforce As a result of the COVID-19 pandemic, existing staff resources were shifted around to meet the unique needs of operating in a pandemic environment. They were also reallocated to meet the crucial demands of the COVID-19 related programs.

Learning Plans were updated to help address the ongoing changes in the workforce and the way services were delivered.

During the lockdowns, emphasis was placed on the mental and physical well being of staff.

Mentoring and acting opportunities were employed to share knowledge and provide staff with additional experience to address the challenges created by retirements and departures of departmental staff.

The act builds on protections already in place under other statutes, as well as collective bargaining rights, policies, practices and processes in the Manitoba public service.

Wrongdoing under the act may be a contravention of federal or provincial legislation, an act or omission that endangers public safety, public health or the environment, gross mismanagement, or knowingly directing or counseling a person to commit a wrongdoing. The Act is not intended to deal with routine operational or administrative matters.

Manitoba's success in attracting immigrants by measuring Manitoba's proportion of annual immigrant admissions to Canada's total economic immigrants and rural settlement.			Manitoba received 16,575 immigrants in 2021, which accounted for 4.1% of the Canadian total (406,005). This marks a decline in Manitoba's proportion of Canadian immigration. The annual average percentage of Canadian immigrants landing in Manitoba was over 5% from 2012 to 2020. Nevertheless, Manitoba's share of permanent resident admissions continues to exceed its proportion of Canada's total population (which was 3.6% in 2021). In 2021, the Manitoba Provincial Nominee Program (MPNP) accounted for over 80% of Manitoba's economic immigrant admissions and 62% of Manitoba's total landings. In 2021, approximately 23% of immigrants destined for Manitoba settled outside of Winnipeg, with Brandon, Neepawa, Steinbach, Morden	From 1998 to 2011, the annual number of immigrant admissions to Manitoba increased more than fivefold, from 3,004 to 15,975. Since then, immigrant admissions have been fairly stable, averaging over 14,800 annually from 2012 to 2021. Excluding COVID-impacted 2020 -- which saw a marked decline in immigrant admissions due to delayed federal processing times and travel restrictions -- immigrant admissions to Manitoba have averaged over 15,500 per year since 2012. In 2021, immigrant landings in Manitoba recovered from COVID-disrupted 2020. Permanent resident landings across all immigration categories rebounded to 16,575 in 2021, increasing by over 90% from 2020 (8,610). Overall Economic Class landings recovered to 12,825 (by 97%) while provincial nominee landings grew to 10,330 (a 77% increase from 2020). Permanent resident admissions of MPNP candidates have increased markedly since 1999; growing from 418 to an annual average of 9,885 admissions since 2012. In 2021, Manitoba received over 19% of all Provincial Nominee Program (PNP) admissions in Canada. By comparison, Manitoba welcomed 15% of all Canadian PNP admissions in 2020, and received 20% of such admissions from 2012 - 2021

**The Private Vocational Institutions Act
Training Completion Fund**

**Financial Statements
For the Year Ended December 31, 2021
(Unaudited)**

To the Operators and Students of Manitoba's Private Vocational Institutions

Dear Stakeholders:

I am pleased to present the eighteenth annual report of the Manitoba Training Completion Fund, for the period January 1 to December 31, 2021.

The Private Vocational Institutions Act, administered by the Registration and Accountability Office, aims to provide consumer protection for both students and registered institutions. The Training Completion Fund (the Fund), a means to protect students in the event of an institution's closure, helps to further this goal.

Private vocational institutions remit one per cent of all tuition collected into the Fund on behalf of students enrolled in registered programs. Forty-seven institutions remitted their students' contributions to the Fund in 2021.

If you have questions about this annual report, you are encouraged to contact the Manager of the Private Vocational Institutions Branch at 204-945-8507.

Sincerely,

Jon Reyes
Minister
Advanced Education, Skills and Immigration

DESTINATAIRES : Intervenants et étudiants des établissements d'enseignement professionnel privés du Manitoba

Bonjour,

Nous sommes heureux de vous présenter le rapport annuel du Fonds d'aide à la formation du Manitoba pour la période du 1^{er} janvier au 31 décembre 2021.

La Loi sur les établissements d'enseignement professionnel privés qui régit le Bureau d'agrément et de contrôle vise à protéger à la fois les étudiants et les établissements agréés. Le Fonds d'aide à la formation du Manitoba, fonds créé pour protéger les étudiants en cas d'une fermeture d'établissement, permet de mieux atteindre cet objectif.

Les établissements d'enseignement professionnel privés contribuent au Fonds d'aide à la formation en y versant 1 % de tous les frais de scolarité qu'ils perçoivent pour les étudiants inscrits dans des programmes agréés. Quarante-sept (47) établissements ont contribué au Fonds en 2021.

Si vous avez des questions au sujet du présent rapport annuel, n'hésitez pas à communiquer avec la direction des Établissements d'enseignement professionnel privés au 204 945-8507.

Veillez agréer l'expression de nos meilleurs sentiments.

Ministre de l'Éducation postsecondaire, du
Développement des compétences et
Immigration,

Jon Reyes

TRAINING COMPLETION FUND

The Private Vocational Institutions Act (“the Act”) received Royal Assent on August 1, 2002. Section 13 of The Act established the Training Completion Fund, which is a “pool” of monies to be used to help finance the completion of training contracted by students should an institution unexpectedly cease to do business.

The Act came into force on January 1, 2003. Under this legislation, if an institution’s registration is cancelled or not renewed, or if the institution becomes insolvent, the Minister may pay an amount out of the Fund for the completion of a student’s program or to refund a student’s tuition fees in the manner prescribed by the regulation. If there are insufficient monies in the Fund to pay for the completion of the program or to refund the tuition, the monies paid out must not exceed the amount of revenue in the Fund. Monies, in this case, are paid out on a pro rata basis.

The regulations under the Act further outline details of the Fund. The Fund is capitalized by registered private vocational institutions which submit payments in the amount of one per cent of all tuition collected (private and third-party-pay tuition). The Training Completion Fund Report and payments are submitted quarterly, by institution, with a list of all students by program intake, including the email and telephone number for each student. This action essentially “registers” a student with the Private Vocational Institutions Branch in the event that the Fund is accessed during the student’s scheduled training period.

The Private Vocational Institutions Act Training Completion Fund

Notes to Financial Statements

Section 13 of The Private Vocational Institutions Act and sections 25 to 27(7) of Manitoba Regulation 237/02 regulate the establishment and operation of the Training Completion Fund. The purpose of the Fund is to provide protection to students so that they are able to complete their training at another institution or receive a refund in the event their institution closes. All private vocational institutions (“registrants”) submit payment in the amount of one per cent of all tuition collected (private and third party tuition) to the Private Vocational Institutions Branch.

On a quarterly basis, institutions are required to submit a list of all students by program intake, including the address and telephone number for each student, to the Private Vocational Institutions Branch. Institutions are also required to submit a list of all student names, email, telephone numbers, and third party funders for those students who have withdrawn from their course of studies. The completed Training Completion Fund Report and a cheque made payable to the Minister of Finance must be submitted to the Private Vocational Institutions Branch.

Fifty-six institutions were actively registered in 2021. Of these, several focused solely on contract training; that is, training that is not regulated under the Act or subject to Training Completion Fund requirements. As a result, forty-seven institutions contributed to the Fund in 2021.

1. Cash equivalents included in cash are recorded at cost. Market values approximate cost. Cash equivalents are all highly liquid securities with a maturity of three months or less when purchased.
2. Contributions receivable relate to outstanding payments from private vocational institutions at year end.
3. Per subsection 13 (3) of The Private Vocational Institutions Act, the Fund may only be used to:
 - a) Make payments to another institution for the completion of a student’s program of instruction or refund tuition fees to a student when a registered institution becomes insolvent,
 - b) Make payments to another institution for the completion of a student’s program of instruction or refund tuition fees to a student when a registered institution’s registration is cancelled or is not renewed,
 - c) Pay for administering and auditing the Fund.

Glossary

Alignment – The process of enabling all employees to see how their day-to-day actions are consistent with the values of the organization and how living those values is contributing to overall success. Creating alignment ensures employees are working toward the common goal, or vision.

Appropriation – amount voted by the Legislative Assembly approving the maximum amount that may be expended on a specific program or major activity during a fiscal year.

Main Appropriation – the total amount of each resolution passed by the Legislative Assembly as reported in the printed estimates of expenditure.

Sub Appropriation – the total amounts applicable to the various breakdowns of the main appropriations in the printed estimates of expenditure.

Authority – In the financial tables throughout this report, represents the authorized votes approved by the Legislative Assembly in the Estimates of Expenditure as well as any changes as a result of the January 18, 2022 government reorganization, allocations from Enabling Appropriations, or virement transfers between main appropriations within the department. For a full reconciliation of the Printed Estimates of Expenditure to the Authority please see the Expense Summary by Appropriation report in the Report on the Estimates of Expenditure and Supplementary Information (REESI).

Balanced Scorecard – is an integrated strategic planning and performance measurement tool.

Baseline - The current level of performance for all measures.

Cascading – This is the process of developing aligned balanced scorecards throughout an organization. Each level of the organization will develop scorecards, based on the objectives and measures they can influence from the group to whom they report. Cascading allows every employee to demonstrate a contribution to overall organizational objectives.

Consolidation Impacts – The adjustments needed to bring the revenue and expenditure of the Other Reporting Entity (ORE) into the summary budget, and to eliminate transactions between entities to avoid duplication of revenues and expenses (ex: a government grant is counted as an expenditure of core government and is eliminated from the revenue of the ORE).

Full-Time Equivalent (FTE) – A measurement for number of positions. Every full-time regular position represents one full-time equivalent position. Other categories (ex: term, designated departmental) are measured in proportional equivalents, ex: a program with a vote of 1.50 term FTE could hire staff in any combination that results in a total of one-and-one-half years (or 78 weeks) of employment (ex: 6 staff for 3 months (13 weeks) each; 2 staff for 9 months (39 weeks) each; 1 full-time and 1 half-time staff for 1 year; 3 half-time staff for 1 year; etc.).

Government Reporting Entity (GRE) – Core government and the prescribed reporting organizations, such as Crown corporations, government agencies, government business entities and public sector organizations such as regional health authorities, school divisions, universities and colleges.

Grants – Public money provided to an individual, organization or another government to assist in attaining their objectives and for which the government does not receive a good or service.

Gross Domestic Product (GDP) – Represents the total market value of all final goods and services produced in the Manitoba economy.

Guarantees – The province, in the normal course of business, may provide a guarantee to honour the repayment of debt or loans of an organization, primarily GBEs. Such a guarantee is provided on the Manitoba Hydro Savings Bonds.

Initiatives – These are the specific programs, activities, projects, or actions an organization will undertake to meet performance targets. Initiatives are often projects or events that aim to improve a process or an outcome in one of the four perspectives.

Interfund Activity – Public Sector Accounting Standards adjustments including Health and Education Levy and Employee Pension and Other Contributions, attributed to the entire department.

Measure – A measure is a standard used to evaluate and communicate performance against expected results. Measures are normally quantitative in nature, capturing numbers, dollars, percentages, and so on. Reporting and monitoring measures helps an organization gauge progress toward effective implementation of strategy.

Mission Statement – A mission statement defines the core purpose of the organization — why it exists, and reflects employees’ motivations for engaging in the organization’s work. Effective missions are inspiring, long-term in nature, and easily understood and communicated.

Objective – The objective is a concise statement describing the specific things an organization must do well to execute its strategy. Objectives often begin with an action verb such as increase, reduce, improve, or achieve. Strategy Maps are comprised entirely of objectives. “Strengthen respect in our workplace” is an example of an objective on the government Strategy Map.

Other Reporting Entity (ORE) – Reporting organizations in the GRE such as Crown corporations, government agencies, government business entities and public sector organizations such as regional health authorities, school divisions, universities and colleges that are directly or indirectly controlled by the government, as prescribed by Public Sector Accounting Board – excludes core government.

Perspective – In balanced scorecard language, perspective refers to a category of performance objectives (the highest category of measures that sub-measures or key performance indicators tie into). The standard four perspectives are (Financial, Client, Internal Process, and Employee Learning and Growth).

Special Operating Agencies (SOA) – Service operations within departments granted more direct responsibility for results and increased management flexibility needed to reach new levels of performance. SOAs embrace market disciplines of the private sector while adhering to the public policy imperatives of government. Annual business plans define financial goals and performance targets. SOAs have the ability to raise capital outside of the Consolidated Fund.

Strategy – This represents the broad priorities adopted by an organization in recognition of its operating environment and in pursuit of its mission. Situated at the centre of the balanced scorecard system, all performance objectives and measures should align with the organization’s strategy.

Strategy Map – The strategy map is a visual representation of what must be done well to execute strategy. Strategy maps reflect performance objectives spanning the four perspectives, combining to tell the organization’s strategic story.

Target – The target presents the desired result of a performance measure. A target provides the organizations with feedback about performance.

Values – Values represent the deeply-held beliefs of the organization, which are demonstrated through the day-to-day behaviours of all employees. An organization’s values make an open proclamation about how it expects everyone to behave. Values should endure over the long-term and provide a constant source of strength for an organization.

Virement – Refers to a transfer of expenditure authority between operating appropriations within a department

Vision – A powerful vision provides everyone in the organization with a shared mental framework that helps give form to the often abstract future that lies ahead. Effective visions provide a word picture of what the organization intends to ultimately become — which may be 5, 10, or 15 years in the future. This statement should contain as concrete a picture of the desired state as possible, and also provide the basis for formulating strategies and objectives. The vision serves as the guiding statement for the work being done. It should answer why the work being done is important.
