

Mitigation and Preparedness Program

Stephanie Woltman, A/Manager of Mitigation
July 27, 2022

Mitigation and Preparedness Program (MPP)

- When a disaster that is eligible for federal cost-sharing assistance occurs, an MPP program will also be announced
- A 2022 MPP is being offered to eligible municipalities
- The MPP is an optional program to assist municipalities to mitigate against future disasters

Mitigation and Preparedness Program (MPP)

- Municipalities that incurred damages during the event can now invest the value of the municipal share of their DFA claim into building resilience

**Your municipal share
of a DFA claim**

=

**Amount available for
your MPP project**

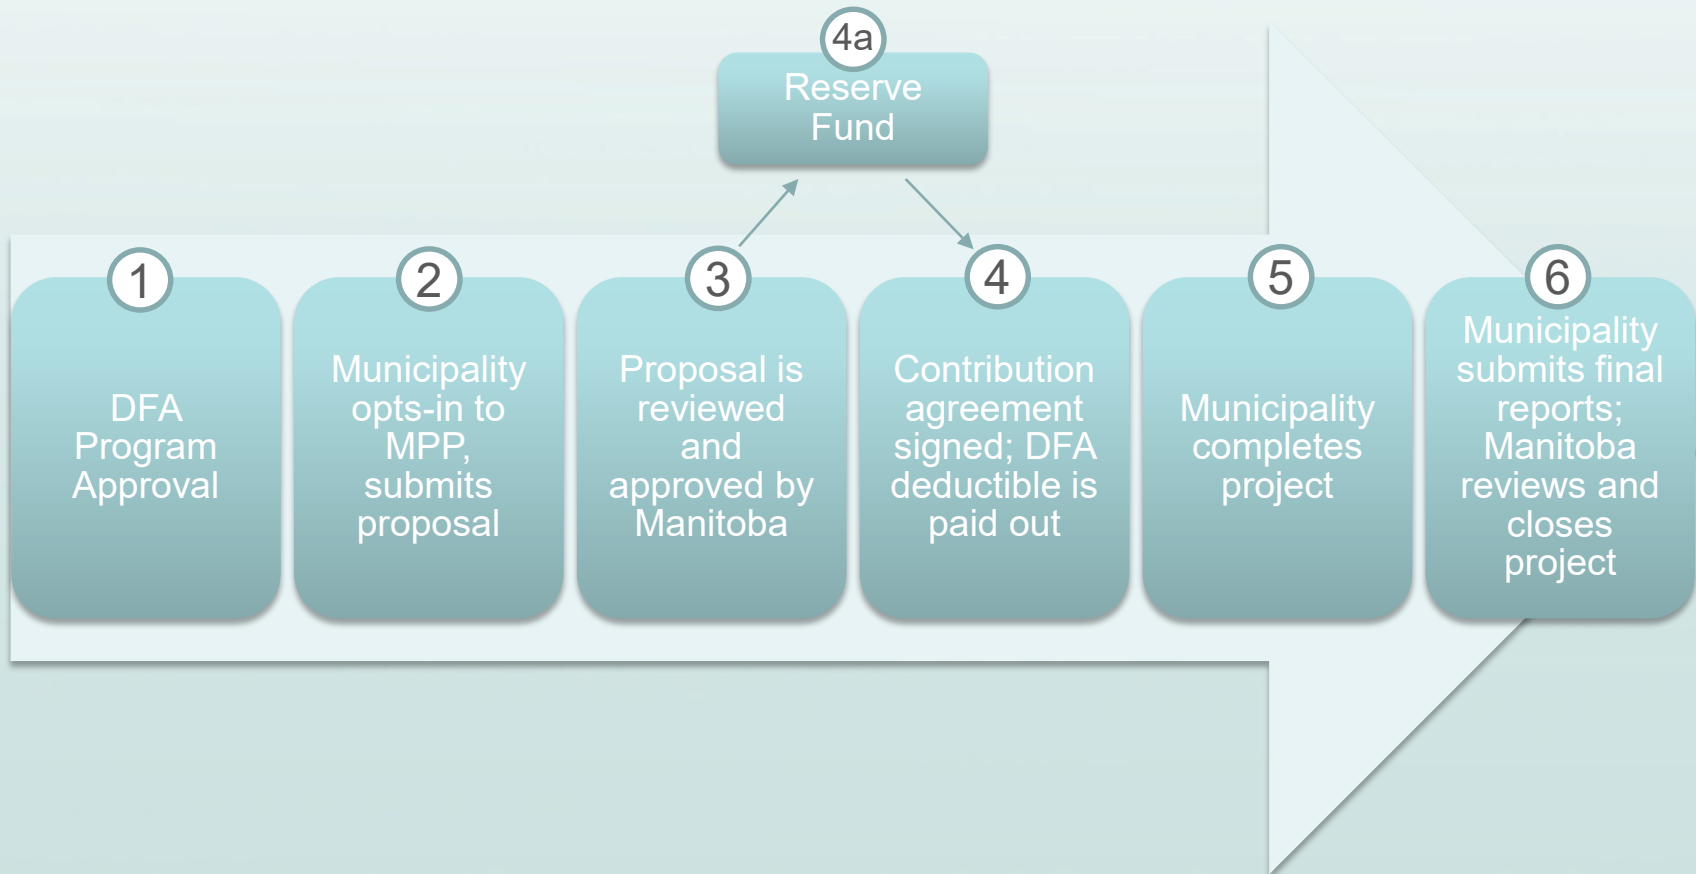

Mitigation and Preparedness Program (MPP)

- Unlike the DFA program, the MPP amount does not have to be invested in a damaged site
- The MPP amount is meant to be invested into anything that will benefit disaster preparedness or mitigation in the municipality and is separate from DFA

MPP Guiding Principles

1. Investments are cost-effective and evidence based
2. Projects to include regional implications
3. Projects focus on the management of risk
4. Partnerships are developed
5. A sustainable approach is undertaken
6. Projects lead to resilient municipalities

MPP Program Process

Using MPP Funds

Municipalities will have options for using their MPP funds to:

- Invest in the approved MPP project immediately
- Partner with another local authority on a joint project
- Create a mitigation/preparedness reserve account and set aside funds to use toward an approved MPP project in the future

Applying to MPP

- Must be accepted into the DFA program
- The MPP deadline is September 23, 2022
- Required documents to apply:
 - A completed project proposal signed by the CAO
 - A council resolution indicating approval of the proposal

MPP Website

Visit the MPP website for additional information on the MPP:

- Program guidelines and eligible projects
- How to apply for the MPP
- How projects are evaluated
- Reimbursement and reporting processes
